Chickballapur town be assumed to cost Rs. 1,89,469 not only may be dropped not only because the cost is beyond the resources of the Mity but also because the source cannot be considered to be a perennial one throughout the year. and a simpler scheme sought for. The Sanitary Engineer is of opinion that the system of bore wells might perhaps be successful in a place like Chickballapur in order to assure an adequate supply of water to the town He therefore suggests that two bore-wells at a cost of Rs 1500 each may be tried in the first place to test the yield of water and if they are successful the system would be developed later on

6) This proposal is in accordance with the Town Note of the Dewan D' in the Chickballapur Div in the month of Aug 1941. (para 3)

7) In connection with the question of the drainage scheme of Chickballapur town, on which orders have issued very recently, it was stated by the DC Kolar that

J 51/2 Improvement of water Supply at Chikballapur town

General and Revenue Secretariat — File No 72 of 1942 — [App F III-2

Serial No

That a sum of Rs 2000 was provided by the Chikballapur Town Municipal Council in its budget for the year 1941-42 for the improvement of water Supply at the place. It is not known if the Municipal Council has also provided an equal sum for the purpose during the current year. If the Municipal Council has provided the amount towards its Municipal quota of the cost, a grant of ~~Rs 1000~~ Rs 1500 might perhaps be given to make up the estimated cost of Rs 3000/- for sinking two borewells at the place (at Rs 1500 for each borewell) as ascertained by the Sanitary Engineer

8) Submitted with a draft letter to the D.C. Kolar for appl

Re Improvement of drainage and water supply in Chickballapur Town Municipality

---

With reference to your letter No I 11117 dated 21/5/1942 enquiring whether the system of putting down bore wells for the improvement of water supply to meet the increasing requirements of Chickballapur town has been approved by the Director of Public Health, I have the honour to state that the views of the Director of Public Health have not been received as yet He has been again requested to furnish his views in this behalf A further reference will be made soon after a reply is received from him

I have the honour to be,
Sir,
Your most obedient servant,

DEPUTY COMMISSIONER,
POLAR DISTRICT

DPR.2

This is only an ad interim reply. This will be placed in the main file as Drainage Water Supply to Chickballapur town which has been separately sent, after its return the receipt of further communication will be awaited, if any

Put up 5/6

The point is that, in order to enable the local body to undertake the sinking of a borewell at this place, a grant has to be sanctioned during the current year out of the water supply grant

If the reply is not received by the 15th with
it will not be possible to sanction the grant this yr
The matter is indeed urgent & there was
an interpellation on the subject at the recent
R. A. also
difficulty that is in furnishing the
Opinion. Medical Dept R.A. may be consulted
in the matter
£ 11500 9/6/42

Forwarded with compliments with
the direction of this Health for favour
of stating when his opinion would be required
by the Secretary of State in the matter when
may be kindly treated as very urgent

Subject - Re Improvement of Water Supply to Chickballapur Town

D.No 7451 Dep'd P.H 9/6/42

With reference to your Memo No 11500 dated 9-6-1942 forwarding in original letter No M5 C 768/41-42 dated 30th May 1942 of the Deputy Commissioner, Kolar District on the above subject, I have the honour to state that no separate reference was received from the Deputy Commissioner on the subject while recommending to Government water supply and Town Improvement grants under 30 Grants the Deputy Commissioner sent copies of letters addressed to Government with a request that the grants recommended by him may be supported by the Director of Public Health The requisitions received from all the Deputy Commissioners were compiled and sent to Government and no opinion could be given for putting down borewells for the improvement of water supply to Chickballapur Town

I herewith enclose a copy of letter No 1862 dated 18th June 1942 of the Sanitary Engineer opining that two borewells in suitable places costing about Rs 1,500/- each may be tried in the first instance as part of the scheme for water suppl to Chickballapur Town and the costly scheme of getting water from Karabappa's well may be dropped The original reference of the Deputy Commissioner is returned herewith

DIRECTOR OF PUBLIC HEALTH

JBT

Letter No 1863 dated 18th June 1942 from the Sanitary Engineer, Bureau of Sanitary Engineering, Bangalore, to the Director of Public Health in Mysore, Bangalore

Re Improvement of water supply to Chickballapur Town

With reference to your letter No C 47-131 dated 15th June 1942/ regarding the above and requesting me to furnish the views of this Department to the improvement of water supply to Chickballapur town, etc , I have the honour to state that a scheme to supply water to Chickballapur town from Maragappa's well was prepared some time back as the estimated cost of this scheme was Rs 1,59,469/-, the Municipal Council were not in a position to meet its quota of the scheme On account of the heavy day to day rise in prices of pipes, this estimate will go much higher no further, the supply from Maragappa's well cannot be counted as an unfailing source

The chief trouble in connection with water supply to Chickballapur town has been the fact that a suitable source from which an adequate supply of water can be obtained all the year round, has not so far been available

Alternately, it is suggested that a number of borewells, two or three, may be sunk and if the yield from these is found satisfactory, a scheme of water supply to Chickballapur town may be developed from these borewells The proposal of the Municipal Council, therefore, to sink borewells to meet the requirements of water to the town may be accepted with advantage and further arrangements made to obtain necessary funds The area round about Chickballapur is fertile and if the investigation by means of borewells of the underground supplies in the neighbourhood is taken on hand, I consider that it will be possible to have successful bores near the town itself The cases of Kodballapur, Arsikere, Kaptur, etc being such cases on hand, it is desirable to spend about Rs 10,000/- or Rs 12,000/- on such an investigation

Two borewells in suitable places costing about Rs 1,500/- each, may be tried in the first instance as part of the above programme and the costly scheme of getting water from Maragappa's well may be dropp/
